About Pumpmakers

PM Pumpmakers GmbH is an Austrian solar company, specializing in the research and development of power and water solutions, using renewable energy sources.

Pumpmakers focuses on solar pump systems that provide rural and urban areas with access to water, Internet, electrical power and light. Additionally, Pumpmakers carries out water exploration projects, constructs water wells, provides solutions for WASH (water access, sanitation and hygiene) and agricultural projects, and supports governments, NGOs and CSR activities with the implementation of entire projects.

A team of engineers and constructors tackles the challenges posed by the global water crisis head-on to design and develop truly self-sustainable water pump systems with a clear goal: millions of people all over the world should have access to safe, clean drinking water.

Pumpmakers Water Pumps can easily be set up to replace pre-installed water pumps, such as hand water pumps, generator-powered water pumps or windmill water pumps.
