Provide Water & Work

PM Water Tower

Datasheet

Imagine how easy it would be to erect a water tower and store a steady supply of water in an elevated tank without labour-intensive concrete or construction works. The PM Water Tower, a fully equipped water tower with a height of 6, comes in just a single box.

The PM Water Tower offers many advantages!

- Robust and durable thanks to a galvanised water tower with a height of 6m**
- For water tanks with a diameter of up to 2m and about 5,000 litres of water**
- Safe thanks to an integrated ladder and safety railings**
- More water can be stored if several towers are arranged next to each other**
- Can be used as a 6m high advertisement tower**

## About Pumpmakers

**PM Pumpmakers GmbH** is an Austrian solar company, specializing in the research and development of power and water solutions, using renewable energy sources.

To meet the needs of a fast-growing market, Pumpmakers focuses on innovative solar pump systems for the supply of rural and urban drinking water, water well construction, water well drilling, and agricultural purposes.

A team of engineers and constructors tackles the challenges posed by the global water crisis head-on to design and develop truly self-sustainable water pump systems with a clear goal: millions of people all over the world should have access to safe, clean drinking water.

Pumpmakers Water Pumps can easily be set up to replace pre-installed water pumps, such as hand water pumps, generator-powered water pumps or windmill water pumps.
